➤ **Bachelor of Politics, Philosophy and Economics (PPE)**

PPE Degrees were first established at Oxford University in the 1920s and they have since become an established degree in leading universities across the world. The rationale for PPE degrees derives from the recognition that the major issues in contemporary society nearly always contain very strong political, philosophical and economics dimensions. PPE degrees have always been a compelling option for those students who seek to become tomorrow's decision makers and opinion shapers.

La Trobe's PPE degree provides students with a broad and sophisticated knowledge base to analyse policy debates and social challenges. Content includes specialist subjects that integrate politics, philosophy, and economics. There is also a focus on students being able to develop their capacity to apply a PPE perspective to analysing public policy challenges. PPE students are encouraged to join the student-led PPE Society which regularly holds meetings and high-profile public events.

Students study core and elective subjects from economics, philosophy, and politics in their first year, and in their second and third years, study across the three disciplines or specialize in two. Students also have the option to undertake some elective study in any non-PPE discipline of their choosing.
